

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claim 1. (Currently Amended): A device for preventing a vehicle from speeding, which device comprises a switching device, a speedometer present in the vehicle, which is connected to said switching device and which measures the speed of the vehicle, as well as a transmitter connected thereto, wherein the switching device is so arranged that the transmitter will ~~only~~ transmit a signal ~~mainly~~ only if and as long as the speed measured by the speedometer is higher than a predetermined limiting value, wherein the speedometer also comprises a GPS position finding device, and wherein the speed is determined in that the distance between two positions as found is divided by the time required for covering said distance.

Claim 2. (Previously Presented): The device according to claim 1, wherein the device comprises inputting means, by means of which a user can adjust the limiting value at his own discretion.

Claim 3. (Currently Amended): The device according to claim 1, ~~wherein the device comprises a GPS position finding device and~~ wherein the limiting value is adjusted in dependence on the geographic position of the vehicle as found.

Claim 4. (Cancelled)

Claim 5. (Previously Presented): The device according to claim 1, wherein the transmitted signal comprises an acoustic signal.

Claim 6. (Currently Amended): ~~A~~The device according to claim 1, wherein the transmitted signal comprises one of light and ~~or~~ laser pulses.

Claim 7-8. (Cancelled)

Claim 9. (New): A device for preventing a vehicle from speeding, which device comprises a switching device, a speedometer present in the vehicle, which is connected to said switching device and which measures the speed of the vehicle, as well as a transmitter connected thereto, wherein the switching device is so arranged that the transmitter will transmit a signal only if and as long as the speed measured by the speedometer is higher than a predetermined limiting value, wherein the device furthermore comprises a detector for detecting external measuring equipment for measuring the speed of a vehicle, wherein the switching device is furthermore so arranged that the signal will only be transmitted upon detection of said external measuring equipment.

Claim 10. (New): The device according to claim 9, wherein the device comprises inputting means, by means of which a user can adjust the limiting value at his own discretion.

Claim 11. (New): The device according to claim 9, wherein the limiting value is adjusted in dependence on the geographic position of the vehicle as found.

Claim 12. (New): The device according to claim 9, wherein the transmitted signal comprises an acoustic signal.

Claim 13. (New): The device according to claim 9, wherein the transmitted signal comprises one of light and laser pulses.
